Harvest at optimum maturity  
Fermentation and maceration under pomace in concrete vat until the end of the malolactic fermentation, then maturing in "floating lid" vat (closed)  
No sticking. Loose filtration  
Bottling in March according to the lunar calendar

*Its geological situation of plain and clay gives greedy and "open" fruits with characteristic expressions of fullness, suppleness and smoothness. Its dark and dense colour, conceals very pronounced aromas of red fruits. The sweet and juicy final note will make the tasting unforgettable.*

*Here is a pleasure wine, a wine to be shared with friends or tasted alone after midnight, a wine of meditation or to be offered to your love ones. It is up to you to choose the moment.*
